

■ Rincomatic_Ventoo Kit for induction

Rincomatic_Ventoo generates bi-directional breathing in the cabinet, allowing to place a functional drawer below the induction hob, which does not heat up.

- Drawer does not heat up
- Induction cooktop works restlessly
- Reinforce and Ventilate cabinets
- Toe Kick also breathes

Rincomatic_Ventoo OCULTO

OCULTO version of Rincomatic_Ventoo provides an uniform aesthetic remaining invisible. It reinforces cabinets and leaves necessary space for a proper ventilation of the induction

Rincomatic_Ventoo VISTO

VISTO version of Rincomatic_Ventoo, located aligned with front doors, matches handles style and appliances colors thanks to the variety of finishes available. It reinforces cabinets and leaves necessary space for a proper ventilation of the induction.

Rincomatic_Ventoo Traditional Gola

Rincomatic_Ventoo Flat Gola
